System Walkthrough & User Guide

Listener Website & Station Portal

The platform has **two parts**: the **Listener site** (what the public sees and hears) and the **Station Portal** (where staff log in to run the station, at `yourdomain.co.za/portal`).

There are three access levels:

- **God Admin** — top authority (Padiah Glantorious, Operations Manager). Manages everyone including the CEO; can never be deleted.
- **Elevated Access** — the CEO (Kutlwano Nqaba) and anyone granted it. Manages all accounts except the God Admin.
- **Presenter** — enrolled staff. Views everything, edits news, manages own settings.

The portal screens in this guide are shown from **Kutlwano Nqaba's login (Elevated Access)**.

PART 1 — THE STAFF PORTAL

Staff open `yourdomain.co.za/portal` and log in. Every portal screen shows, across the top: **Welcome, [Name]** with their **title**, a gold **access badge** (God Admin / Elevated Access / Presenter), a **Log out** button, and the tab row: **Chat · News · Shows · Members · Settings**. Managers see all five tabs; plain presenters don't see the Shows tab.

Screen 1 — Chat tab

The live listener message feed (read-only for staff).

- Shows 🎙 **Listener Chat** — live requests, shout-outs and dedications as listeners post them.
- Before anyone posts it reads "*Listener requests appear here.*"
- Read-only on purpose — presenters respond **verbally on air**, not by typing.

Buttons: **Chat / News / Shows / Members / Settings** switch screens; **Log out** ends the session.

Screen 2 — News tab

Edit the "top stories" that scroll on the listener site. Everyone can edit news.

Each story row has four fields: **Tag** (e.g. LIVE), **Date**, **Headline**, and **Detail**.

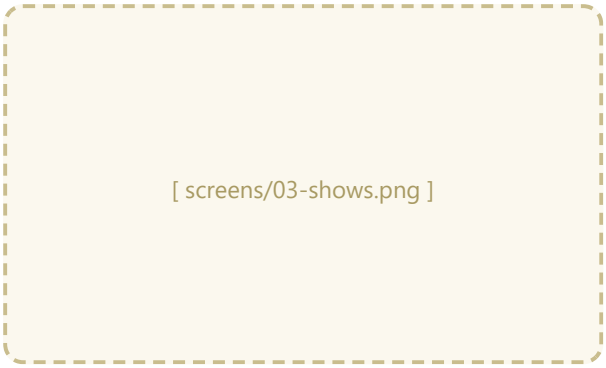

Buttons:

- **+ Add story** — adds a new empty story row.
- ✕ **(red)** — removes that story.
- 💾 **Save news** — saves all stories; goes live on the ticker instantly.

> Nothing saves until you press **Save news**. A "✓ Saved — live on site" message confirms it.

Screen 3 — Shows tab (managers only)

Manage the on-air schedule — shows and timeslots.

Three separate schedules via the top switch: **Weekday (Mon–Fri)**, **Saturday**, **Sunday** — weekend programming is built separately. Each show row has **Start time**, **End time**, **Show name**, and **Presenter**.

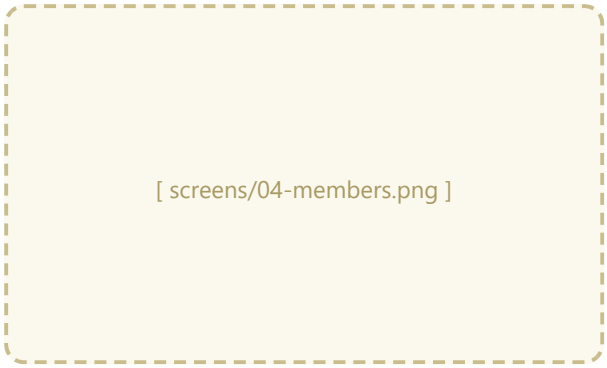

Buttons:

- **Weekday / Saturday / Sunday** — switch which day you're editing.
- **+ Add [day] show** — adds a show row to that day.
- ✕ **(red)** — removes a show.
- 💾 **Save shows** — saves all three schedules; the site uses the right day automatically.

> The listener site picks Saturday, Sunday, or weekday by the real day, and tags whichever show is on air right now as "ON NOW".

Screen 4 — Members tab

See the team and manage access. Presenters can view only; managers can enrol, elevate, revoke, delete, and edit titles.

Enrol form (managers): **Email** (their login), **Full name**, **Title**, then **+ Enrol**. New presenters sign in with their email and the shared password.

Each member card shows a **name**, a gold **access badge**, and an editable **title** box.

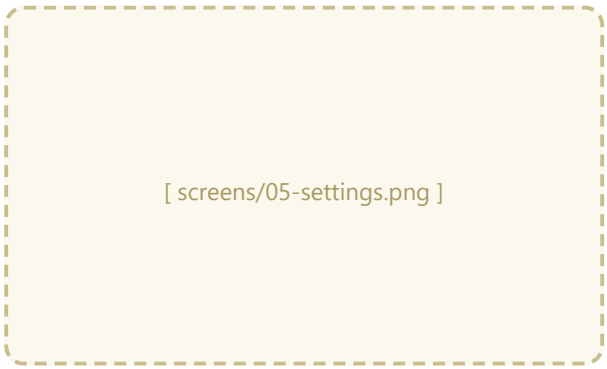

Buttons (managers, where allowed):

- ↑ **Elevate** — grants a presenter Elevated (admin) access.
- ↓ **Revoke to presenter** — removes elevated access; keeps the account as a base presenter.
- 🗑 **Delete** — permanently removes the account.
- **Title box** — type and click away to save a new title.

> **Access rules:** the God Admin row shows no buttons to anyone below; the God Admin can never be deleted. Elevated users (CEO) manage everyone *except* the God Admin. The God Admin manages everyone, including the CEO.

Screen 5 — Settings tab

Update your own display name and password.

Buttons:

- **Save name** — saves your new display name.
- **Change password** — needs your current password, then the new one.

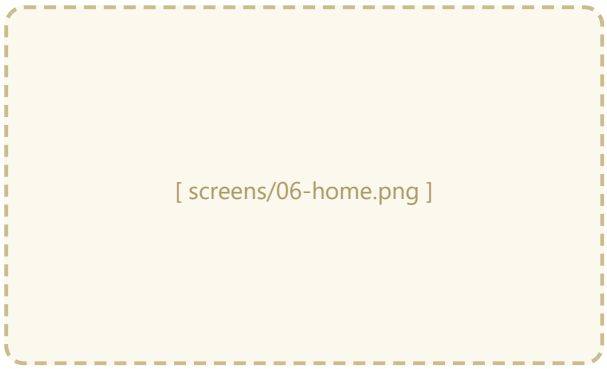

> Every account, including the CEO, can change their own password here. Change the default on first login.

PART 2 — THE LISTENER SITE

What the public sees at `yourdomain.co.za`. Audio keeps playing while visitors scroll or chat.

Screen 6 — Home (Now Broadcasting & On Air)

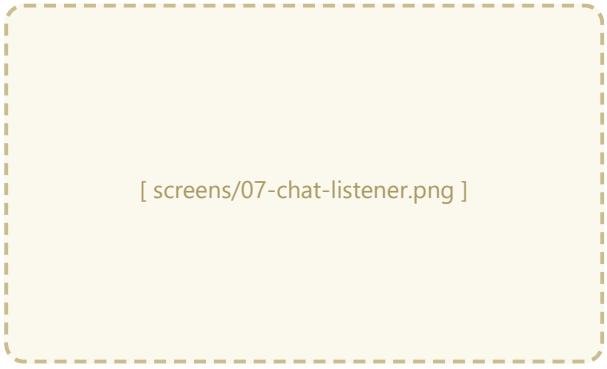

The top of the listener page.

- **Now Broadcasting** — the show on air now, with presenter and timeslot; updates automatically through the day.
- ▶ **Listen Live** — starts the radio; doubles as play/pause ("⏸ Playing Live").
- **Volume slider** — adjusts the level.
- 📰 **News ticker** — the station's top stories scrolling across.
- **On Air list** — the day's full schedule; the live show is tagged **ON NOW**.

Screen 7 — Talk to the Presenters

Where listeners send messages that presenters read out on air.

Controls:

- **Your name** — the listener's name; it **locks** after the first message so it can't change mid-chat.
- **Type a message** — the message to send.
- **Send** — posts it to the chat presenters see in the portal.

> The number of people online is intentionally not shown to listeners.

QUICK REFERENCE — WHO CAN DO WHAT

Action	Presenter	Elevated (CEO)	God Admin
View Chat, News, Members	✅	✅	✅
Edit News	✅	✅	✅
Edit Shows / Timeslots	—	✅	✅
Enrol / elevate / revoke / delete members	—	✅ (not God Admin)	✅ (everyone)
Edit own name & password	✅	✅	✅
Can be deleted by others	✅	✅ (by God Admin)	❌ never

Logins (change defaults before going live)

- **God Admin** — username `GOD_Admin`
- **CEO (Elevated)** — username `CEO_Kutlwano_Nqaba`
- **Presenters** — their email + the shared presenter password

Staff portal: `yourdomain.co.za/portal` · Listener site: `yourdomain.co.za`
